Sergio Rodríguez Pérez

Full Stack Developer · Go · Rust · TypeScript

Madrid, Spain · +34 640 870 770 · sergio.rodriguez.ev@gmail.com · chuwi-dev.me · github.com/Chuwi12

SUMMARY

Full stack developer who learns by shipping real products. Over the last two years I have designed and built **three complete SaaS platforms**, from the database to deployment. Strong on the backend, comfortable on the frontend.

WORK EXPERIENCE

Salesforce Full Stack Developer — VASS

Internship

- Built **Lightning Web Components (LWC)** and **Apex** business logic for customer portals; managed permissions and releases to pre-production.

Frontend Developer — CRC

Internship

- Built an **Angular** web app deployed on **AWS EC2**, with parallel processing of REST API responses.

Network Technician — Erasmus

International

- Network support and configuration, working in English with international clients.

PERSONAL PROJECTS

HR management suite (HCM)

2026

HR platform for companies: time tracking, shift scheduling, payroll, documents and internal messaging.

Go · PostgreSQL · React 19 · TypeScript · Docker

- Architecture of **17 Go microservices** communicating through events, backed by 300+ commits.
- Real-time internal messaging with **end-to-end encryption** and a web client with an interactive org chart.

Nexora — modular CRM/ERP

2026

Each client only accesses the modules they subscribe to: projects, tickets, contracts and invoicing.

Rust · PostgreSQL · Angular 20 · Docker

- **Rust** API with strict data isolation between clients and response times under **50 ms**.
- Invoicing with legally compliant numbering and credit notes, **Angular 20** admin panel and self-managed deployment with automatic HTTPS.

Cuadre — accounting for freelancers

2026

Accounting app built for Spanish freelancers and small businesses.

Rust · Redis · React 19 · TypeScript

- Backend built on **hexagonal architecture**: all business logic is tested without a database.
- Secure sign-in with **two-factor authentication (TOTP)**, brute-force protection and a React 19 frontend.

EDUCATION

Multiplatform Application Development
Higher vocational diploma (EQF 5) · 2024 — 2026

Microcomputer Systems and Networks
Vocational diploma (EQF 4) · IES Virgen de la Paloma · 2022 — 2024

Cybersecurity
Masterd Mind AC

TECH STACK

Languages
Go, Rust, TypeScript, Java, Python, Kotlin

Frontend
Angular, React, Vite, HTML/CSS

Backend & data
PostgreSQL, Redis, MySQL, Oracle SQL, MongoDB, REST/OpenAPI

Architecture
Microservices, hexagonal, multi-tenant, WebSockets

Infrastructure
Docker, AWS, Linux, Git

Security
JWT, MFA/TOTP, data encryption

LANGUAGES

Spanish — Native
English — B2 · Upper-intermediate

ALSO

Chatbot built with Angular and PyTorch (final-year project), a Go service monitor and an Angular portfolio site. Code available on request.
